

Scrum Poker On one page

Each estimator is holding a deck of Scrum Poker cards with values like 0, 1, 2, 3, 5, 8, 13, 21, ? - which is the sequence we recommend.

Deck

The values represent the number of story points, ideal days, or other units in which the team estimates.

The estimators discuss the feature, asking questions of the product owner as needed. When the feature has been fully discussed, each estimator privately selects one card to represent his or her estimate.

DISCUSS

Reveal!

All estimators reveal their card.

Complete?

If all estimators selected the same value, that becomes the estimate.

If not, the estimators discuss their estimates. The high and low estimators should especially share their reasons. After further discussion, each estimator reselects an estimate card, and all cards are again revealed at the same time.

DISCUSS
again

Repeat

The poker planning process is repeated until consensus is achieved or until the estimators decide that agile estimating and planning of a particular item needs to be deferred until additional information can be acquired.
